

The Starweld range of multi-process, inverter based welding machines. They are microprocessor controlled, which reduce the component count and increase the output consistency, and are capable of memorizing, multiple welding parameters simultaneously.

FEATURES

- Tersatile Multi-process Capability Including DC Stick, Lift TIG, Solid and flux-cored Mig welding and carbon arc gouging up to a 13.5mm carbon.
- Thigh Duty Cycle Designed to deliver 100% duty cycle at maximum current with ambient temperatures up to 40°C.
- Kigh Open Circuit Voltage A powerful 72 Volts, is ideal for Air Carbon Arc Gouging.
- * Manual Metal Arc Control Menu When performing manual metal arc welding, the arc can be adjusted to obtain a softer or more aggressive arc characteristic.
- **X** Adjustable Indultance Control The rate of current rise and fall in the MIG mode can be controlled to reduce spatter, improve fluidity, and to enhance bead appearance.
- Digital Amp and Volt Meters Bright display of welding parameters, both presentable and actual.
- ★ Unique Cooling System The "tunnel" cooling design, protects critical components and printed circuit boards free from dust.
- **Robust Construction** Components are securely mounted to enable the machine to operate in hazardous environments, including being mounted on generator sets.
- **Portable and Robust** Due to the inverter technology the Starweld range of equipment is extremely lightweight and energy efficient.
- Two Year Warranty Warranty on all parts and labour.

AVAILABLE OPTIONS

Wire Feeder

Water Cooler

Undercarriage

Remote Control

Foot Pedal

Volt Loc **VRD**

| Technical Specifications | ORION 600 |
|---------------------------|----------------|
| Input Voltage | 380V |
| Input Current | 59A |
| Rated Output Voltage | 44V |
| Rated Output Current | 600A |
| Duty Cycle @ 40°C Ambient | 100% |
| Dimension - W x H x L mm | 355 X 440X 510 |
| Weight | 48.5KG |
