

Head & Face Protection

Helmet Flip Front 108 x 51 mm

- Polypropylene welding helmet for MIG, TIG & arc welding
- Offers full protection and complies with EN 175

Description	Item Number
Helmet	W053151

Filter Lenses

Our shaded and clear lenses are a standard size of 108 x 51 mm replacements for helmets. They offer high quality eye protection for all types of arc welding, including the necessary protection against ultra-violet rays. Clear cover plates, inserted in front of the shaded lenses protect them from molten metal spatter and typical wear.

Uom	Description	Weld Current Range	Process	Process Area	Item Number
Proclear					
Each	Clear glass	All	All	Indoor/outdoor	W053046
